Earn global yield with no foreign bank needed.
Exclusive Beta Launch with rewards open to 500 participants.

The Problem

Inflation is quietly eroding yen savings.[1]

Everyday, local businesses are losing more and more value on idle cash.
The price of rice already doubled and inflation is up 10x from past averages.

¥350 trillion in idle cash at Japanese corporations
is earning close to zero yield that fails to beat inflation.
Plus, accessing global returns is hard:

- ✕ Offshore account hassles
- ✕ Few compliant tools
- ✕ Financial jargon headaches
